

The right information in every condition

Specifications:

Product Code	400.0000
Power	230 VAC
Grade IP	IP 54
Brightness	2400 mcd WHITE LED
Operating temperature	-20 / +55 C°
Comication	Rs485 Owner protocol
N° letter	4x16 tot 64 letters
Letter height	50mm
Visible writing	Fixed (sliding froml 17° letter)
Weight	15Kg
Dimensions	1000 x 75 x 450 (L x W x H)

Visual

The TagItalia Visual device is equipped with LEDs that are perfectly legible and can be read from any angle. With this characteristic, the display it can be installed both in an indoor environment, not illuminated directly by sunlight, or in the presence of strong lighting.

With its excellent brightness Visual is recommended in the case there is a strong artificial lighting, as in a television studio, or when it must be legible from a distance.

With a letter height of 50mm, the display can be viewed up to a distance of 20 meters. Its compact dimensions and its robustness make it suitable for installations in industrial environments also in outdoor areas.

Thanks to the communication via RS485 it can easily be inserted as an event display device in information or diagnostics systems.
